

Teacher Technology Stipend

Teachers who have 20+ students will be issued a once every five years technology stipend of \$400 to purchase a laptop or other technology equipment as needed to facilitate their job.

Beginning in September 2011, stipends will be added to teacher accounts the last working day of September each year (based on the five year cycle) if teacher is serving 20+ students on that date, or has an average of 20+ from the first day of school until that date.

Teachers who presently have a laptop checked out from the school will be able to use their full 2011-12 stipend to "purchase" that computer if their student count meets the above requirements.
